**BILLFISH ANGLERS:** This survey to determine the trend in recreational fishing in the Pacific Ocean has been conducted annually since 1969. The survey is in cooperation with the International Game Fish Association. Your response will enable us to determine average catch rates of specific billfish in the areas indicate. Accurate records are needed to determine the effect heavy fishing on billfish resources is having on the anglers catch. Response is voluntary.

For each angler that fished for billfish in 2006 we request that you individually, and as accurately as possible, indicate the number of days you fished for billfish during the calendar year of 2006 and the number of billfish caught by species. **Fish tagged and/or released are counted as caught.** If you fished but were unsuccessful, it is still important to indicate the number of actual days fished.

The U.S. Government requires that all mailing lists be revised annually. If you did not fish but would like to remain on the mailing list, complete the address portion at the bottom of this card and return. If you do not return the card, your name will be removed from our mailing list. Your cooperation is requested, and by completing the address portion you will be advised on the survey results. **Please return by JUNE 2007.**

Public reporting burden for this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other suggestions for reducing this burden to Diana Hynek, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the internet at [dHynek@doc.gov](mailto:dHynek@doc.gov)). Notwithstanding any other provisions of the law, no person is required to respond to, nor shall any person be subjected to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.

## ATTENTION

Thank you for your support.      Fine fishing for now and forever!  
Suzanne Kohin, Fisheries Biologist & Randall C. Rasmussen, Computer Specialist
